**Financial Overview**  
**Future Plans**

# Introduction from the Founder/Director

Help Aid Africa is dedicated to community empowerment across Africa. Our efforts are geared towards helping them better their lives with education, affordable and available healthcare, and humanitarian services.

Our first responsibility is to the children, women and men, the youth, and the elders, living in Africa.

Our second responsibility is to our donors and sponsors to demonstrate transparency and accountability of our projects in Africa. We are then responsible to our communities in North America to educate them on the needs and challenges that families in Africa face. We invite you to learn more about the projects we have done and plan to do, and to join hands with us in serving communities in Africa.

We have plans to expand our provision more widely and whilst it is becoming increasingly challenging to find new sponsors, we are hopeful of continuing to obtain new supporters for our work. We look forward to what 2023 has to bring.

**Mr. Abbas Moloo - Founder & Executive director,**

# What we do

We strive to provide the skills and accommodations to nurture a generation of self-sufficient individuals.

# Our Achievements

This year we achieved a significant milestone as highlighted in our projects highlights below.

# Project Highlights - Education

Education provides stability in life. Just by being educated and holding certificates, you get a better chance to better career opportunity and opening new doors for yourself.

Help Aid Africa has been running a school sponsorship program where over 300 students all over Kenya and Tanzania benefitted from the program.

Just this year alone (2022), Help Aid Africa has sponsored over 80 students from junior primary to university with their school fees giving them opportunity to learn like everyone else. This initiative is aimed at providing an opportunity to underprivileged students to shape their own future

# Project Highlights - Health

About 2 billion people worldwide suffer moderate or severe forms of food insecurity, calling for correctional measures involving economic strengthening interventions. Primarily concentrated in low- and middle-income countries (LMICs), these people are facing irregular access to nutritious and sufficient food. Because of this, they are exposed to a greater risk of malnutrition and poor health in general.

In 2022, Help Aid Africa ran a food distribution program in most parts of the country (Kenya and Tanzania) targeting drought-stricken areas, widows, orphans, the malnutrition's and the sick. This program has been aimed to address food insecurity in the proposed areas: nutrition supplementation for people, food and cash transfers to affected households, and livelihood programs for individuals affected by long-term food insecurity.

# Project Highlights - Livelihoods

In vocational training, young people attend training and study to learn a relevant skill within a specific occupation that they can use to make a living in the future.

In 2022, Help Aid Africa started a vocational training initiative aiming at giving youths an opportunity to get skills that will help them mold their own careers.

The vocational training program includes tailoring and ICT training program at lady of Mercy Children's home, vocational training for 2 unprivileged kids at Mikindani vocational training center where one is training as a mechanical engineer while another is taking an advanced Catering and food production program.

We also continued to offer small loans to our youth development program where 2 benefitted and started their own business; a fish selling and supply business and a high tech audio-visual production studio.

# Project Highlights – Orphanages

Help Aid Africa , support many of the children that lack basic commodities like a home, food , clothing and education

Help Aid Africa supports them with a range of therapies and helps rebuild their trust and self-esteem, the organization also clothes them and takes them to a home where they can live, eat and resume their education.

One such home is Lady of Mercy children’s Home in Mikindani, Mombasa county. The Home has a lot of kids , some are total orphans, others were taken from the streets after running away from home while others were abandoned by their parents at a very young age.

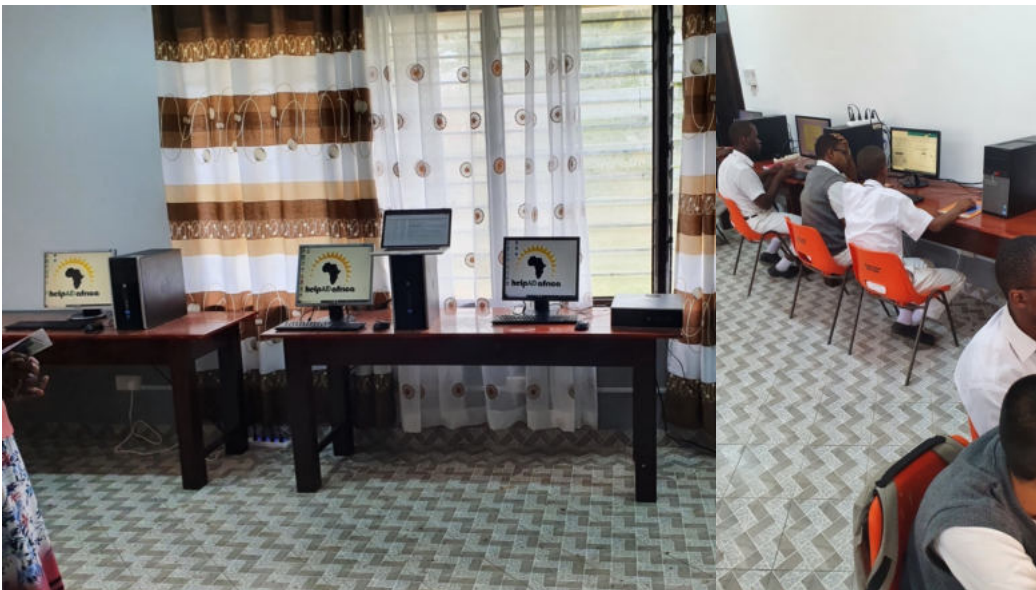

In 2022, Help Aid Africa has dedicated its support in renovating Lady of Mercy children’s home by re-constructing its kitchen to meet the required standard, re-construction of the drainage system at the home, installation of the new submersible water pump to ensure the home doesn’t lack water, general electrical repairs and plumbing, re-construction of the boy’s dorm and re-painting the home.

# Project Highlights – Digital Literacy

We believe that through the introduction of ICT programs in our schools, we are able to teach self-efficacy to kids all over Africa through digital learning skills.

Our main aim is to equip the less privileged with digital skills and thus offer them better opportunities to earn a living through digital skills. We believe that smart use of the internet could lessen African poverty, but rural Africans lack digital skills and computers to gain from the digital economy, even though developed countries have an abundance of used computers.

In 2022, Help Aid Africa managed to install a fully equipped computer lab at Allidina Visram high school which helps the students from the school in learning digital skills during computer lessons, the students can now do research and they can now do online projects that will see them graduate with the skills needed in this digital era.

The digital literacy program also introduced ICT lessons at Lady of Mercy children's home aiming at providing digital literacy to the kids living at the orphanage. Skills that they would not have otherwise found anywhere else.

Dennis, a disabled youth from Masai Mara also became a beneficiary of the project after Help Aid Africa facilitated him with a modernized and a fully programs equipped laptop which he uses to self-learn and do online assignments earning him a living while learning.

# Project Highlights – Library Project

On a visit to a number of Kenyan schools ,especially rural schools, you find that the schools don't even have a library room , let alone the books that would have been playing great roles in giving students a more effective education by increasing the quality and quantity delivered.

The library system implementation at Allidina Visram played a great role in developing the student's self-expression, self-discipline, self-reliance, utilization of senses and development of ability for clear logical thought and critical judgment.

The approach brought to mind a large number of related terms - self-expression, play way, learning by experience, inquiry and learning by discovery among others. Through these methods, the students are

allowed to follow the natural course of their felt interests without arbitrary interruption. The teacher's role change from the controller of the learning to that of the organizer of education to an increasing extent, their role depends upon an ability to organize learning situations and manage the resources provided.

# Project Highlights – Feeding program

At Zungulukani Primary school which has over 270 students, most of the students were skipping school due to hunger and students who were attending the school were fainting due to the drought that strikes the area.

Help Aid Africa started a feeding program at the school late Last year and also at Voi primary and since then both schools has reported an increase in performance and zero absenteeism .

A visit to children's home with goodies and snacks and for others even cooking for them right there in various parts of Voi saw kids from those areas celebrating their 2022 Christmas holiday like everyone else by being fed, and getting Christmas and New Year gifts which otherwise they would never receive.. making sure they have enough food for cooking at their homes over this festive celebrations just like it happens in everyone's homes..

# Project Highlights – Water Well Project

The quest for water for a village where women and children had to walk 5 Kilometers to fetch water came to end after Help Aid Africa came to their aid and facilitated drilling of a pure water well.

The water well will provide the villagers with pure drinking water and runs at a zero-maintenance cost since the water pump runs on a clean solar energy.

After a long time suffering from drought and having to walk miles to fetch water, the residents of Mirihini Village of Kwale County in Kenya can also now breathe as Help Aid Africa came to their Aid by bringing water right near their doorsteps. Help Aid Africa did piping in the village from a local school with an underground well and installed an electric submersible pump that can pump water at high pressure supplying the scarce commodity to the village .

# Project Highlights – Other Activities

In November 2022, Help Aid Africa did a renovation of the toilets and the sewage system at Phylis Wambui Children's home in Nakuru Kenya where the orphans hosted at the home lacked toilets and use to go the bush to relieve themselves. Most people benefited from Help Aid Africa's clothing drive all over Kenya throughout the year.

Help Aid Africa facilitate the construction of grade 5 classroom at Mara Angels Academy which helped with the education of the kids or the Marianda community of the Masai Mara

In November 2022, Help Aid Africa started development of a community center at Mirihini, Kwale county, the project is underway and upon completion will see residents of the drought-stricken area get access to commodities from the shop at the center, have access to a religious area from the center, have free access to water and sanitation from the center and even provides the community members with a meeting and sports ground

Help Aid Africa in early 2022 constructed a sanitation toilet at a community center in Voi for the residents of that area

# Our Team

---

**RAFIQ BATCHA – President**

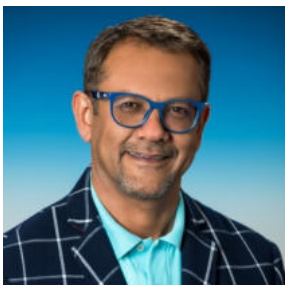

His responsibilities include setting short- and long-term goals for the organization, managing budgets, and ensuring that all departments meet their goals. Rafiq works with other organizational leaders to ensure our departments run as efficiently as possible and our organization meets its set goals.

**ALI SYED – Secretary**

Ali Syed is responsible for keeping the organization's operations running smoothly, keeps records of the organization's work files and meetings minutes.

**ABBAS MOLOO - Treasurer**

The treasurer focuses on the budget of the the organization and makes sure all financial needs are met on set time

Net Revenue	22,657.69
<b>Total Equity</b>	<b>\$214,221.31</b>
<b>TOTAL LIABILITIES AND EQUITY</b>	<b>\$216,339.61</b>

# Future Plans

As we have grown as an organisation, so has our reach and impact on the communities in Africa. At the same time, the organisation has stayed small in size and intends to remain as such to maintain the personal level community involvement.

We have plans to increase our community development projects and involvement, expand on our educational project so as to see more learned and self-sufficient members of our community.

Help Aid Africa also has plans to increase local income generation, introducing vocational training in vast areas of the communities as well as supporting exit strategies for those children we support who are now finishing their secondary and tertiary education.

We also intend to continue with the development of our community center in Mirihini, Kwale and also continue our developments at Mara Angels primary school including additional classrooms and spaces which will allow us to introduce new programmes to further support the community.

We have a plan to install a new computer lap at Voi primary school on 2023 aimed at expanding our digital literacy program.

There are many exciting ideas and activities planned for 2023 and we hope you will join us on the journey towards achieving them.
